

Angola Home Solar Systems

Overview

Solar Home Systems (SHS) are smaller photovoltaic systems with batteries that can cover the basic energy needs of households or small businesses and are usually operated off-grid. The facility is located in Cazombo, capital of the newly created province of Moxico. Angola has set a target of 60% access to electricity by 2025 under the strategic plan 'Visao 2025,' of which solar is poised to play a central role. Supporting electrification as well as diversification, solar projects are being rolled out by the government alongside international partners and. Energy access in Angola is limited to less than 48% [i] of the population, with a lower access in rural areas where wood and charcoal remain the main source of energy and livelihood. Developed in partnership with MCA Group and Hitachi Energy, the project is the largest solar initiative in sub-Saharan Africa. The National Director of Renewable Energy and Rural Electrification (DNERER), Mr. Inaugurated in December 2025, this groundbreaking project features a.
