

# Ark creatures that can be used as lockers

## Overview

---

Below is a list of every Creature currently in the game, all of the announced upcoming creatures, and how they can interact with one another. If you can get one the Ravanger from Aberation is great, saber size, large weight plus discounts on almost most base material, can jump and use zip lines. Sounds brilliant but i don't have the dlc plus the server I'm on dosent have it in its pve cluster yet : ( Ravagers can be also be obtained on. Freedom Games LLC (the "Company") or our corporate affiliates own, license, and/or operate games and other software (individually a "Game", and collectively the "Games") and websites (individually a "Site", and collectively the "Sites"). Some of the animals you can carry with you include Dodo, Trike, Raptor, Paraceratherium, Brontosaurus, Ankylosaurus, Stegosaurus, Pteranodon, Dimorphodon, Carbonemys, and Megalodon. I made this list for myself but felt like it could be useful for others and posted it to Reddit where it received overwhelming support.
