

# Armenia Solar Power Generation for Home Use

## Overview

---

Recent reports indicate a significant move by the Armenian government to bolster its renewable energy sector: a proposed \$50 million subsidy program aimed at encouraging the installation of rooftop solar panels for households and businesses. While this development signals a major commitment to. If in 2021 the share of solar energy in the total volume of electricity production in Armenia was 1.2%, then in 2024 it will be ten times more - 11. This remarkable growth highlights the country's commitment to transitioning toward renewable energy sources and reducing dependence on fossil. Largest Farm Goes Online, With More on the Way According to data by the Public Services Regulatory Commission (PSRC), the country's utilities regulatory body, Armenia has 75 operating utility-scale solar farms with a total installed capacity of 289.4 MW and annual generation of 540 GWh. Solarvance » Countries » Solar energy is helping Armenia diversify beyond its aging nuclear plant Geographical Location: Armenia is a landlocked country in the South Caucasus region of Eurasia, bordered by Georgia to the north, Azerbaijan to the east, Iran to the south, and Turkey to the west. Discover project insights, industry data, and renewable energy trends shaping the Caucasus region.
