

Bahamas solar energy policy

Overview

The Government's National Energy Policy (NEP) is on track to expand its solar energy capacity to 30% of total energy production by 2033. This goal is supported by the Inter-American Development Bank (IDB) and the Bahamas Development Bank (BDB). Currently, solar power makes up less than 1% of all the provision of energy as an input of production. The Government further realises that the sustainable development of The Bahamas and effective management of the Energy Sector through clearly defined policies, including legal and institutional frameworks, and partnerships with the private sector. NASSAU, BAHAMAS- The Bahamas' National Energy Policy 2025-2030 is targeting a cleaner energy future as renewable sources currently account for just 2%. The country's energy landscape is heavily reliant on imported. The Bahamas is undergoing a significant energy transformation, a key topic in recent Bahamas energy news, as it moves from fossil fuels toward a future powered by renewables. For entrepreneurs and investors in the photovoltaic (PV) industry, this shift presents a ground-floor opportunity.
