

Can photovoltaic panel lights be placed indoors

Overview

With the right placement or type of setup, solar lights can work well even inside your home. But not the same way you use them outside. Solar lights need a light source to charge, and sunlight is the best option. Solar panels are made for outdoor use, but they can work if set up near a window. They can also work under indoor lights, but that's not efficient at all – or useful.

Can photovoltaic panel lights be placed indoors
