

# Can photovoltaic panels be laid on prefabricated roofs

## Overview

---

It is possible to install rooftop solar panels on prefab homes in most cases. The key requirement for these homes is to have the correct joint strength and roof structure required to support the heavyweight of PV solar panels. The short answer is NO, but it can be done with extra effort and creative thinking. ✓ Prefab homes aren't structurally designed to accommodate solar panels compared to traditional or site-built. Solar panels can be installed on almost any type of roof—as long as there's access to sunlight.
