

Commercial wind power generation system in Armenia

Overview

generates less than 1% of annually, as there were only four wind farms in 2023 and less than 10 MW is installed. According to a study sponsored by the (DOE) and the (USAID) in 2002-2003, the theoretical potential of Armenia is 4,900 MWe in four zones with a total area of 979 km . According to this research, the

Commercial wind power generation system in Armenia

Wind power in Armenia

Wind power generates less than 1% of Armenia's electricity annually, as there were only four wind farms in 2023 and less than 10 MW is installed. According to a study sponsored by the United States Department of Energy (DOE) and the United States Agency for International Development (USAID) in 2002-2003, the theoretical wind power potential of Armenia is 4,900 MWe in four zones with a total area of 979 km . According to this research, the wind energy

[Wind Energy Resource Atlas of Armenia](#)

This wind energy resource atlas identifies the wind characteristics and distribution of the wind resource in the country of Armenia.

Global Wind Atlas

The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high-wind areas for wind power generation virtually anywhere in the world, and then ...

[Wind power generation , Armenia](#)

Official and up-to-date data of Armenia for all years of statistics, in an easy-to-read format. Analysis of wind power generation with advanced

tools for comparisons, trends, shares, and various metrics.

[Commercial wind power generation system in Armenia](#)

The Program will identify new power generation facilities, electricity transmission systems, and institutional issues related to market liberalization and associated legislative gaps.

[Energy system transformation - Armenia energy profile](#)

As of 1 January 2020, wind energy implementation in Armenia was limited. In addition to already-operating wind farms with total installed capacity of 4.23 MW, only one more is under construction ...

[ARMENIA IABILITY ASSESSMENTFOR POTENTIAL IND...](#)

The objective of this assignment is to conduct an in-depth analysis of the legal and regulatory framework governing the energy sector in Armenia, with a specific focus on in particular the large scale wind ...

Wind power in Armenia

The most promising areas for wind power plants are Zod pass, Bazum Mountain, Jajur pass, the territory of Geghama Mountains, Sevan Pass, Aparan, the highlands between Sisian and Goris, and the ...

[Exploring the Untapped Potential of Wind Energy in Armenia's Energy](#)

As of 2020, the country's installed wind power capacity stood at a modest 7.6 MW, with the Lori-1 wind farm being the only operational wind power facility. This accounts for less than 1% of ...
