

# Constant Temperature and Humidity Type Data Center Racks in Xiong an New Area

## Overview

---

Raritan SmartSensors are a rack mount solution to monitor environmental conditions, including; temperature, humidity, airflow, air pressure, water/leaks, contact closures, proximity detection, vibration and more. Because data centers are high-density enclosed spaces that generate a significant amount of heat, traditional comfort cooling systems can't remove enough heat to protect the critical equipment. In a typical. A purpose-built humidity control system for critical facilities, the Constant Humidity Unit integrates wet-membrane (evaporative) humidification with refrigeration dehumidification in one intelligent package. It automatically switches modes and continuously regulates RH to a user-selected setpoint. Temperature and humidity have a significant impact on your data center infrastructure. SmartRack Pre-Configured, Self-Cooling. Like lock and key, cooling and humidity come as a pair. However, humidity is often the forgotten half of the equation. The advanced feature set allows for easy deployment, clear identification of hot spots, and better airflow management.
