

Cost of 100kW Solar Outdoor Cabinet Used at Australian Airports

Overview

A 100kW solar system in Australia costs \$86,200 - \$95,000, produces around 380 - 440 kWh per day, and typically suits commercial and industrial sites aiming to save \$28,000 - \$32,000 per year, depending on usage and feed-in tariffs. The 100kW commercial solar system generates an average of 400kWh. 100kW solar systems are among the most popular commercial solar system sizes in Australia, as this size is the cutoff point for up-front incentives through the federal government. This article provides an overview of most of the key points that businesses need to know if they are considering a. A 100kW commercial solar system is considered a good choice for medium to large businesses, especially those who struggle with high electricity costs. By installing solar panels your business may be more or less self-sufficient when it comes to electricity. But don't panic! You still get a subsidy known as 'LGCs' (covered in point #5 below in more detail). This is paid every year and is based on how much energy the system actually generates.
