

Cuba has height restrictions on rooftop solar panels

Overview

The solar ordinance sets height requirements for solar systems to not extend further than three feet above the ridge level roof and cannot extend further than ten feet above surface roof. The Cuban government has announced an extension of customs benefits aimed at promoting the importation of solar panels and other renewable energy technologies. This initiative, outlined in Resolution No. 169/2025 from the Ministry of Finance and Prices, seeks to update the tax framework governing. Travelers from Miami can now bring renewable energy equipment into Cuba duty-free as blackouts worsen and fuel shortages deepen on the island. La principal queja se centra en el límite de entrada de solo un panel por. Large consumers in the residential sector could find in the installation of solar panels a way to offset the amount of their energy bill through cogeneration for self-consumption or receive a payment for injecting clean energy into the national power grid. As such, developers building near the maximum allowable height may not be permitted to install rooftop energy systems.
