

# **Electric vehicle charging infrastructure democratic republic of the congo**

## Overview

---

Under the MoU, the two sides will jointly explore and develop a riverfront mega-urban project covering approximately 6,300 hectares, while gradually converting more than 300,000 gasoline-powered vehicles to electric vehicles, and establishing a comprehensive electric bus. Under the MoU, the two sides will jointly explore and develop a riverfront mega-urban project covering approximately 6,300 hectares, while gradually converting more than 300,000 gasoline-powered vehicles to electric vehicles, and establishing a comprehensive electric bus. The Democratic Republic of the Congo (DRC) is on the cusp of an electric vehicle (EV) revolution. As the global shift towards sustainable transportation accelerates, the DRC is uniquely positioned to play a significant role in this transition. A key component of this transformation is the. Kinshasa, Octo- The Government of Kinshasa, the capital of the Democratic Republic of the Congo, and Vingroup (Vietnam) have signed a Memorandum of Understanding (MoU) to collaborate on research and development of large-scale urban projects and green mobility. However, efforts are being made to develop EV charging infrastructure through local initiatives, international collaborations, and government support.
