

# Electric vehicle costs canberra

## Overview

---

Compare running costs of Electric Vehicles (EVs) against Internal Combustion Engine (ICE) Vehicles. Calculate your potential savings, break-even point, and environmental impact instantly. Households with electric vehicles could save up to \$2,000 per year over the next 10 years. That's according to the Australian Energy Market Commission's recent report on Residential electricity price trends 2024. From September 1 this year, it will become more expensive to register electric cars in the Australian Capital Territory (ACT) -. Indeed, the world is finally taking note of the many benefits that electric cars can bring. Two years free registration is being replaced with an emissions-based registration system where zero emissions (and low emissions) vehicles will be charged less registration than high emissions vehicles.
