

# Electricity market trends abkhazia

## Overview

---

Abkhazia faces a chronic electricity crisis that traditionally hits its peak severity during the winter. On the eve of the 2025 cold season, the de facto authorities vowed to prevent an energy collapse. However, a close look at the reality on the ground suggests their promises. Abkhazia is experiencing an energy shortage due to low water levels in the Enguri hydroelectric dam. In September, Abkhazia blocked a law allowing Russian citizens to buy. In September 2021 there was an increase in total electricity generation by 26% on a yearly basis, and a decrease by 8% on a monthly basis. Generation exceeded consumption by 43 mln. kWh - 4% of total generation for. The fallout from Abkhazia's political crisis, which led to the downfall of President Aslan Bzhaniya in late November, has since evolved into one that impacts the economy. Over the last week, Abkhazia was hit with twin economic setbacks stemming from Russia, its primary financial benefactor. In recent years, this "seasonal crisis" has worsened due to uncontrolled cryptocurrency mining, which has increased the republic's overall. Russian authorities have started delivering "humanitarian" electricity to the breakaway Georgian region of Abkhazia to alleviate a severe energy crisis, Interfax reported Monday, citing the region's energy and transportation ministry.

### **Home Energy Storage (Stackble system)**

High Efficiency    Easy installation    Safe and Reliable    Perfect Compatibility

**Product Introduction**

- Scalable from 10 kWh to 50 kWh
- Self-Consumption Optimization
- Integrated with inverter to avoid the compatibility problem
- LFP battery, safest and long cycle life
- Stackable design for easy installation
- Capacity of high frequency
- Emergency Backup and Off-Grid Function
