History of the electricity sector

Electricity in Haiti is 110 volts, alternating at 60 cycles per second. Most of the generation infrastructure in Haiti is very old and costly to maintain and operate. In 2006, total installed capacity was only 270 MW, of which about 70% was thermal and 30% hydroelectric. There are currently three large thermal plants and one hydroelectric plant serving the metropolitan area and some smaller thermal and hydroelectric plants in the provinces. The most important plants are:
