Overview

The Somaliland Energy Security & Access (SESA) project is a comprehensive national initiative focused on expanding clean energy access, enhancing security infrastructure, fostering strategic partnerships, and driving sustainable development across Somaliland. Electricity powers our homes, businesses, and industries, but without proper safety measures, it can become a silent and deadly threat. Common causes of electrical accidents in Somalia include: These risks are magnified in crowded markets and residential areas, where unregulated modifications and. Energy is one of the key enablers of Somaliland's Vision 2030 and the Big 4 Agenda development programs. Somaliland treats energy security as a matter of national priority. The Somaliland: National Development Plan III (2023-2027) identifies energy as the country's driver into "a. There are significant differences in electricity access between places of residence, as most urban dwellers have access to electricity (80. An article titled " Somaliland: Solar Power and Microgrid Intelligence for an Urban Power Grid," published in June 2021, highlighted that; As.
