

# Electrochemical Energy Storage System HVAC

## Overview

---

Designed for commercial use, ESEAC integrates energy storage, cooling, and humidity control into a single system, cutting peak air conditioning power demand by more than 90% and lowering electricity bills for cooling by more than 45%. Trane® Thermal Battery™ Storage-Source Heat Pump Systems reclaim and store excess building heat and capture outdoor air heat for immediate use or future storage. Help reduce energy costs and decarbonize. Blue Frontier is commercializing ESEAC technology by integrating it into its Dedicated Outdoor Air System. Package designs of thermal energy storage integrated with efficient heat pumps that can respond to supply and cost signals. Modeled and pilot physical installations to demonstrate feasibility. Pumped hydro storage exemplifies this.

## Electrochemical Energy Storage System HVAC
