

# Energy storage system costs in New Zealand

## Overview

---

The average cost of energy storage using lithium-ion technology in 2025 is around \$400–\$600 per kWh for residential systems, with commercial and utility-scale projects seeing slightly lower prices due to economies of scale. Battery prices are coming down, but the upfront cost is still significant. On average, home batteries in New Zealand range from \$800 to \$1,200 per kilowatt-hour (kWh) of storage, depending on the brand and installation requirements. ☐☐ Pro tip: Some battery systems are now bundled with solar panel. Cost Efficiency with Larger Systems: Larger systems offer better cost efficiency, with the price per kWh decreasing as system size increases. transferring and using energy. But how much should you budget?

Let's unpack the key cost drivers: System Capacity: Prices range from NZ\$800–NZ\$1,500 per kWh. Residential rooftop solar PV provides a means for consumers to lower their electricity costs, particularly if they choose to move more of their household energy consumption to LG's battery storage.
