

Equatorial Guinea solar integrated machine for home use

Overview

Summary: This article explores the design and benefits of photovoltaic energy storage systems in Equatorial Guinea, addressing energy challenges through solar innovation. Learn how hybrid solutions can stabilize power supply, reduce costs, and support sustainable development in. Aptech Africa has installed solar systems across 11 villages, with capacities of 5kWp, 15kWp, and 20kWp and battery storage ranging from 12kWh to 36kWh. These off-grid systems were installed in challenging terrains using Ulica solar modules, Growatt inverters, and Ritar lead-acid batteries. One of the systems is a hybrid system and the rest are standalone systems working alongside a generator and existing grid. Details: This project is expected to be the largest self-sufficient solar project on the continent.

Equatorial Guinea solar integrated machine for home use

Our Lifepo4 batteries can be connected in parallels and in series for larger capacity and voltage.
