

Fiber optic solar power generation fraud

Overview

This article will highlight the red flags of fraudulent solar programs and teach you how to protect your personal information, compare offers from different companies, and ensure you're only working with a reputable company before moving forward with solar energy improvements. Solar panel fraud has become a growing concern in the United States, leaving many homeowners stuck with hidden fees, inflated energy bills, and contracts they never fully understood. As more families consider solar energy improvements, dishonest companies exploit the fine print in solar panel. Did a salesperson knock on your door and promise free rooftop solar panels at no cost to you?

Or say you'll never have to pay another electricity bill because government programs, grants, or rebates cover your solar installation?

It's likely a scam. While there are some government-funded solar. Many homeowners never get any solar equipment installed; those who do often get shoddy work. People complain that they were deceived about costs and savings, misled about loans and with the Cons check what resources are available in your state: usa. The con starts with a fast-talking salesperson offering a "limited time.
