

# **Financing scheme for wind-resistant off-grid solar cabinet-based systems in rural areas**

## Overview

---

Lease-to-own programs offer a flexible pathway to acquiring off-grid solar-wind hybrid systems without substantial upfront capital investment. While upfront costs can be steep, there are various incentives and financial models available that can help make your dream of sustainable energy a reality. Monthly payments often align. In remote locations, stand-alone systems can be more cost-effective than extending a power line to the electricity grid (the cost of which can range from \$15,000 to \$50,000 per mile). But these systems are also used by people who live near the grid and wish to obtain independence from the power. The Global Environment Facility (GEF) is the largest provider of funding for projects to support the use of small-scale, off-grid renewables, such as solar home systems, and make them more affordable. The GEF has more than 30 such projects in 20 countries. Understanding these concepts is essential for homeowners who are.
