

# Flexible photovoltaic panels on factory roof

## Overview

---

The FLEX modules bond directly onto the membrane roof system, eliminating the need for solar racking, concrete ballasts, and roof penetrations. With rising electricity costs and increasing sustainability initiatives, Apollo Power's lightweight, flexible solar panels offer a smart, high-return investment for factories. Unlike traditional solar solutions, these panels can be mounted on unique or load-limited roofs, making solar energy. Industrial roofing is increasingly turning to solar power, fitting expansive rooftops with photovoltaic panels. SolarEdge's energy ecosystem is designed to maximize energy cost savings, seamlessly integrating PV, EV charging and storage solutions, promoting safety in combustible. These modules offer unparalleled versatility and efficiency, making them ideal for a wide range of applications, especially in environments where conventional solar panels fall short. The majority of distributed PV applications are on building surfaces. Let's break down why warehouses and manufacturing plants have.
