

Georgia Solar Container Fast Charging

APPLICATION SCENARIOS

Overview

4 million in NEVI funds toward 26 new DC fast-charging stations to close rural gaps and expand its statewide EV network. Chris Kaiser is President of Plugin with 17 years of experience delivering clean energy solutions, including LED lighting, solar and energy monitoring. A recognized LinkedIn expert, he publishes Amped about EV Charging. Georgia is putting more federal National Electric Vehicle Infrastructure (NEVI) dollars to work, with \$24. The Georgia Department of Transportation (GDOT) has selected private-sector partners to build and operate the new. Located along The Ray, the Visitor Information Center in West Point, Georgia is home to the state's very first solar-powered PV4EV (photovoltaic for electric vehicle) charging station. There are over 1300 chargers and 3400 charging ports available in the state. Bock. Editing was provided by Margaret Blanchard. Graphic design assistance by Kaitlin Messic ed with support and funding from Southern Company. It builds upon previous UGA Public Service and Outreach efforts, drawing from applied research and community-inspired resources including Powering Up.
