

# How do photovoltaic panel companies charge

## Overview

---

To find the most up-to-date solar panel costs in 2025, we compared research from the U. This chart refers to the average cost range across all common solar system. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. 5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. Department of. But when you begin comparing quotes, incentives, and equipment types, one question inevitably rises to the top: What do photovoltaic panels actually cost?

The answer isn't a single number you can pull from a chart. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2. 50 per watt of installed capacity (more on price per watt below). solar photovoltaic (PV) systems to develop cost benchmarks.
