

# How many years does it take to pay for photovoltaic panels installed in rural areas

## Overview

---

The solar panel payback period typically ranges from six to 10 years, varying based on system size, location and incentives. In this guide, we'll help you calculate your solar panel payback. The amount of time it takes for the energy savings to exceed the cost of installing solar panels is known as the payback period or break-even period. Some shoppers break even in five years. But the payback time and ROI is different for everyone. The time it takes an individual solar installation to pay back its cost depends on the size of the initial investment, the electric rate from your. Generally, U.
