

# How to adjust the purlin height of photovoltaic bracket

## Overview

---

How to adjust the height of the purlins of photovoltaic panels In this guide, we'll use EcoFlow's 400W rigid solar panel as an example. In the intelligent photovoltaic tracker brackets, cold-formed purlins were used to support the photovoltaic panels, and located spanning the horizontal single-axis and the module frame. meet the increasing demand for lightning protection design of PV installations, it is necessary to calculate. Thereby we have to introduce some solar panel support with Z profiles and purlins brackets, which are hot galvanized steel material for use in long time with better surface and the best cost during the system construction. Remember that viral video of a solar array doing the wave during a Texas storm?

Yeah, that's what. for joining or connecting C or Z section purlins.
