

How to use one photovoltaic panel to connect two

Overview

How to connect multiple solar panels together in series: Connect the positive (+) cable of one panel to the negative (-) one of the next panel. Continue with the rest until all panels are connected. Each method has specific applications and benefits, depending on your power needs and system. Connecting more than one solar panel in series, in parallel or in a mixed-mode is an effective and easy way not only to build a cost-effective solar panel system but also helps us add more solar panels in the future to meet our increasing daily needs for electricity.
