

How to view the photovoltaic site information

Overview

The United States Large-Scale Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U. photovoltaic (PV) facilities with capacity of 1 megawatt or more. Your building was not detected. It looks like this roof may not be ideal for solar, possibly due to shade or rooftop equipment. How much electricity could photovoltaics produce where I live?

How does production change over the year?

How much does a battery help to use all the. Find and download solar resource map images and geospatial data for the United States and the Americas. For more information on NLR's solar resource data development, see the National Solar Radiation Database (NSRDB). The maps below illustrate select multiyear annual and monthly average maps and. We use Google Earth imagery to analyze your roof shape and local weather patterns to create a personalized solar plan. Calculate energy production for selected sites. It is provided by the World Bank Group as a free service to.

How to view the photovoltaic site information

[U.S. Photovoltaic Database](#)

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

Viewer , USPVDB

The USPVDB Viewer lets you discover, visualize, and interact with the USPVDB through a dynamic web mapping application.

Global Solar Atlas

Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for selected sites. The Global Solar ...

[Photovoltaic Geographical Information System \(PVGIS\)](#)

PVGIS is a free web application that allows the user to get data on solar radiation and photovoltaic system energy production, in most parts of the world.

[Solar Resource Maps and Data , Geospatial Data Science , NLR](#)

For more information on NLR's solar resource data development, see the National Solar Radiation Database (NSRDB). Maps The maps below illustrate select multiyear annual and monthly average ...

NY Solar Map

NY SOLAR MAP estimates rooftop and ground mount solar electric potential (PV panels) and connects you to local solar resources.

[How to Perform A Solar Site Survey](#)

The site survey is your opportunity to gather all the information essential for the solar PV system design, permitting, and interconnection process. You will inspect the roof and electrical panel, ...

Project Sunroof

Search for a city, state, or zip code to see solar potential and impact across entire geographic areas. We currently have solar data for portions of 50 states and Washington DC.

[Statewide Distributed Solar Projects](#)

A holistic view of the solar installed in New York State. Discover installed capacity, number of projects, and annual trends for completed projects through aggregated data from NYSERDA, NYS ...
