

# Inergy solar inverter shows E35

## Overview

---

The inverter will automatically attempt to correct this error. If this code is consistently displayed, contact EnviroGroup for a consultation. Check the grid voltage and connection on the inverter. Your solar inverter is the heart of your energy system, transforming the direct current (DC) from solar panels or batteries into usable alternating current (AC) for your home or the grid. When an inverter displays an error code, it's not just a cryptic message; it's a vital signal about your system. The E35 error code can indicate one of two issues. Firstly, it can mean that one of your appliance's electronic components, such as a relay, is not functioning properly. If you're dealing with recurring faults or don't have support from your original installer, GreenLancer can help.
