

Install solar power generation in the field

Overview

One approach to decarbonising agriculture involves integrating solar panels – or photovoltaics (PVs) – into fields of crops, greenhouses and livestock areas. Often known as agrivoltaics, this can help farmers reduce their carbon footprint while continuing to produce food. NREL researcher Jordan Macknick works with teams from University of Massachusetts (UMass) Clean Energy Extension and Hyperion on a photovoltaic dual-use research project at the UMass Crop Animal Research and Education Center in South Deerfield, MA.
