

# Installation of photovoltaic bracket on resin tile roof

## Overview

---

Position panels directly on tiles using specialized solar brackets. Integrate with hidden wiring to maintain a clean roofline. Tile roofs offer excellent structural stability and longevity for solar installations, commonly lasting 50-100 years depending on material composition. Their durability and aesthetic appeal make them ideal candidates for photovoltaic systems, though specialized mounting approaches are required to. This is a solar panel array made up of 24 x 550w solar panels, mounted on rails and heavy duty stainless steel roof hooks on a tiled roof. [more Solar Panel Installation - Should you DIY?](#)

(Rails, Roof Hooks, Panels, etc. This guide is for solar professionals. In California, approximately 15% of residences have tile coverings, making them a significant factor for photovoltaic setups.
