

Intelligent Folding Containers from Southern Europe for Marine Use

Overview

The collapsible heavy-duty OceanPak® is specifically designed for intercontinental shipments and offers an efficient footprint that optimises an ISO sea-container. The reusable plastic containers can be stacked to optimize storage room and folded to reduce volume. Containerised sea trading has a persistent problem: international trade imbalances make the management of empty containers in logistic networks an economic and environmental challenge. Imbalances in transport volumes coming from Asia lead to carriers having to constantly reposition their empty. World first ISO certified five-in-one shipping container set to improve the transportation and logistics industries' efficiency and sustainability. Boca Raton, Florida, USA, Thursday 24th October 2024: Compact Container Systems (CCS) has launched the SeaFold HC 40' container, the world's first. We have a good story for you! Okay, here's the thing: 40% of container transport on land is empty. This form of global inefficiency has to stop. It's patented design can be folded anywhere using only 1 worker, a forklift and just 10 minutes.
