

# Is it profitable to install photovoltaic panels Zhihu

## Overview

---

With solar panel costs dropping by approximately 50% since 2010 and the federal tax credit currently at 30% (though under threat of elimination by December 2025), homeowners are increasingly asking: is solar a good investment?

The short answer is yes, for most homeowners. Installing solar panels is a long-term investment that can pay for itself through utility bill savings. The actual solar panel return on investment (ROI) time depends on several factors, including the cost of panels installed and average monthly savings, which can be maximized with leading. Whether or not solar is worth it is usually dependent on the incentives in your state. Financing Strategy Impact: Cash purchases deliver the highest ROI with \$25,000-\$50,000 lifetime. Federal and (depending on where you live) state incentives make installing solar panels on the roof of your house a fairly affordable, money-saving home improvement project. But new federal legislation has accelerated the expiration of the 30% tax credit for homeowner-owned solar systems, moving. Homeowners who install solar power systems can receive many benefits: reduced electric bills, lower carbon footprints, and potentially higher home values. However, these benefits can come with significant installation and maintenance costs and gains can vary from one house to another. That's right—installing a portable power station.
