

Is solar power generation suitable for home use

Overview

Yes, a solar generator can power a house—depending on its size, your energy demands, and how it's integrated into your home's electrical system. Is my home suitable for solar panels?

Solar panels are built to work in all climates, but in some cases, rooftops may not be suitable for solar systems due to age or tree cover. While smaller solar generators are ideal for backup power and camping, high-capacity systems are increasingly capable of supporting essential home. With increasing interest in renewable energy, many homeowners are exploring alternatives to traditional power sources. Solar generator systems come in two main types: standalone and grid-tied.
