

Longxiang photovoltaic panels were scraped away

Overview

Under enforcement of the Uyghur Forced Labor Prevention Act (UFLPA), U.S. Customs and Border patrol has reportedly excluded Longi solar modules made with Tongwei polysilicon from entering the market, reported ROTH Capital Partners in an industry note. A government-driven factory boom (2020–2023) has backfired, flooding the market with solar panels—twice global demand—collapsing prices and leading to a \$60 billion industry loss. While central authorities push to shut inefficient factories and curb "disorderly competition," local governments are. In the first half of the year, China's manufacturing giants LONGi, Jinko Solar, Trina Solar and JA Solar posted combined net losses of nearly RMB11 billion (US\$1.5 billion). Recently published third quarter reports showed that many of the largest players are posting significant losses as they continue to compete in a vicious price war. In its most recent earnings report, JinkoSolar. HRRC is monitoring the situation in Xinjiang, China, and we are concerned about the lack of transparency in the solar energy market. To combat this. The U.S. in supplying solar panels to the U.S.
