

Loowatt waste management system

Overview

Loowatt System™ is a revolutionary waterless flush toilet system that tackles water scarcity and sanitation challenges by utilizing a patented sealing mechanism to package waste in biodegradable film. When the container is full, the servicing team swaps it out for a new one. According to the World Health Organisation and the United Nations Children's Fund, 60% of the global population does not have. "Closed loop, energy from poop" ☐☐ What?

☐☐ Well, Loowatt Ltd 's closed-loop waste management system is designed to minimise environmental impact and to maximise the power of poo. How?

☐☐ 1) People - Loowatt toilets are safe for the entire family to use in the comfort and privacy of their home.

Loowatt waste management system

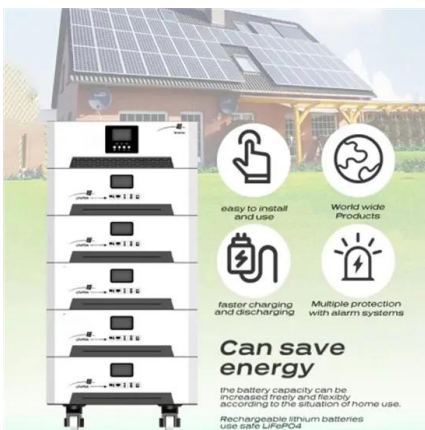

[The Loowatt System - Buckminster Fuller Institute](#)

The technology enables small farmers to transform organic waste into methane gas and organic fertilizer, which increases their efficiency, productivity and resilience.
