

# Maintenance of outdoor solar power generation equipment

## Overview

---

The article outlines maintenance procedures for photovoltaic systems, including inverters, charge controllers, PV arrays, and battery banks. This capacity-building manual was developed as part of the SESA project – Smart Energy Solution for Africa, funded by Research & Innovation funds of the European Union. It is designed for technicians, small and medium-sized enterprises (SMEs) proprietors, and ordinary consumers. National Renewable Energy Laboratory, Sandia National Laboratory, SunSpec Alliance, and the SunShot National Laboratory Multiyear Partnership (SuNLaMP) PV O&M Best Practices. A solar power plant is made up of components such as solar panels, inverters, combiner boxes, distribution boxes, mounts, and connecting wires. Malfunctions in any part of this setup can affect the entire system's functionality.
