

# **Manila s 10 solar power generation system to be equipped with energy storage**

## Overview

---

The first ever solar-plus-storage hybrid resources system in the Philippines is now in operation after energy company AC Energy (ACEN) switched on the site's battery energy storage system (BESS). LONDON, 6 September 2024: Actis, a leading global investor in sustainable infrastructure, has agreed to enter a strategic partnership with Manila Electric Company (Meralco) and its subsidiary, Solar Philippines New Energy Corporation, to invest in the Terra Solar Project, poised to be the world's. The Philippines is betting on battery energy storage systems (BESS) to achieve its ambitious renewable energy (RE) targets and build a more sustainable energy future. With goals of 35-percent RE in the generation mix by 2030 and 50 percent by 2040, the Department of Energy (DOE) sees BESS as a. "The Terra Solar power project is designed to address two critical challenges of our time: the surging demand for electricity and the pressing need to shift to renewable and sustainable sources of energy," he added. GlobalData uses proprietary data and analytics to provide a complete picture of. Energy storage solutions turn daytime solar gains into steady power through the night. The 40MW pilot battery energy storage project in the Philippines has been switched on at the site of.
