

# Melbourne solar container outdoor power

## Overview

---

A complete solar-battery-generator power plant pre-built into a shipping container. We integrate the inverter/chargers, lithium batteries, DC charge controllers, switchgear, ventilation/air-conditioning, fire safety, and remote monitoring. MyEnergy designs and builds turnkey off-grid systems inside 10-, 20- or 40-foot containers, pre-wired, factory-tested and ready to run the moment they land on site. Get your worksite up and running fast with Site Hub, a 40ft modular space designed for rapid deployment. AVID's solar design, installation, commissioning and monitoring services are operated by our teams of skilled engineers and qualified electricians. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects—all while reducing. The solar AIO container is a modular product in a series of products enabling full distributed energy plant deployments anywhere with enough open space to support solar energy. Our containerised system delivers instant access to reliable power.

## Melbourne solar container outdoor power
