

Middle East Energy Storage Power Production

Overview

In this article, Saqib Saeed, Chief Product Officer at PTR Inc., analyze the crucial role of energy storage in shaping the Middle East's power sector. The Middle East and North Africa (MENA) region is at a pivotal moment in its energy journey. In 2024, it supplied over 30% of the world's oil and nearly 20% of its natural gas. This includes enabling physical clean energy infrastructures, emerging clean energy markets and fast and secure information systems to ensure integrity and efficiency of the energy transformation. For that purpose Dii has been maintaining a. Qatar advanced its North Field expansion, with first liquified natural gas from the East phase expected by mid-2026 and total capacity targeting 142 million tons per year by 2030, reinforcing its position as a global liquified natural gas anchor.
