1. Adopt modular design and original "building block" system, which make up by Monet 50kW power module, Monet 100kW power module and Monet 125kW power. Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need a place to live, sheltered from the elements and kept dry and secure. This place is called a "battery enclosure", or what is.
