

New Energy Container Power Generation

Overview

Container Energy Storage Systems (CESS) are revolutionizing energy management by providing flexible, scalable, and efficient power solutions. 's (NYSE: CMI) Power Generation business announced the addition of new Battery Energy Storage Systems (BESS) solutions to their global product line. Fully integrated BESS containers for AC output, the development of this product represents a significant push towards helping customers. The United States alone forecasts solar power generation to grow 75% by 2025, with wind power generation expected to grow 11%. These modular systems, housed in standard shipping containers, are designed to store and distribute energy.
