

New zealand invests in energy storage power station

Overview

The Saft battery division of French energy and petroleum multinational TotalEnergies will supply 70 of its containerized Intensium Shift+ battery energy storage systems (BESS) to form a 100 MW/200 MWh project on New Zealand's North Island. Confirmed yesterday (19 September), the 2-hour duration BESS will be installed at Huntly Power Station on the country's North. In a major step forward for New Zealand's renewable energy future, Genesis Energy has commenced construction on a 100 MW / 200 MWh Battery Energy Storage System (BESS) adjacent to the iconic Huntly Power Station. As lead designer, our strong technical expertise and agile problem-solving to design. fortunate to have a strong history of investing in renewable energy. The continuing investment in renewables is supporting New Zealand to meet the expected increased electricity demand a lectricity demand, the country currently turns to thermal generation.
