

Off-grid solar cabinets for resorts

Overview

Designed for cabins, hunting lodges, and tiny homes, our Off-Grid Cabin Kits deliver reliable, sustainable power in remote settings. These complete solar systems provide everything you need to run lighting, appliances, and essential devices, without relying on the grid. Enjoy all the premium features of the Pro Series, now conveniently integrated into a pre-wired, IP-rated cabinet for hassle-free installation and peace of mind. Our fully off-grid, clean-energy platforms power everything from guest lockers and restrooms to food & beverage modules and digital service hubs—bringing. Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need a place to live, sheltered from the elements and kept dry and secure. If you want your cabin to run without power lines, you'll need to understand solar panels, batteries, charge controllers, and inverters. If you haven't visited some of NewGrid's resort projects, here's the tl;dr version! Picture this: an eco-adventure resort thirty miles off Panama's Pacific Coast, running entirely on. The project deploys 1 unit of 125kW/258kWh energy storage cabinet paired with 1 unit of 125kW PCS (Power Conversion System).
