

Off-grid solar-powered containerized oil refinery in Cairo corrosion-resistant

Overview

This project, worth EGP 550 million, will see a new installation of solar panels at the Assiut oil refinery. These solar power cells will have a 10-megawatt capacity and are scheduled to be completed in the next 11 months. Egypt is taking another step towards achieving its goal of obtaining 42% of its electricity through renewable sources by 2035. The Ministry of Petroleum and Mineral Resources announced that they are launching a new project to increase the country's production of solar energy. Photo: AFP The project will be implemented by an. According to our latest estimates, Egypt was the second-largest non-OPEC (Organization of Petroleum Exporting Countries) producer in Africa of total liquid fuels in 2023, behind Angola. The Benban Elsewedy Electric Solar PV Park in Aswan, Egypt.
