

# Oslo Data Center Uses 10MW Solar-Powered Containers

## Overview

---

Green Mountain designs, builds and operates highly secure, innovative and sustainable data centers in Norway and the UK, which are powered by low-cost, 100% renewable power. A new 10 MW data center will be completed by September 2024. Green Mountain has started new construction work at its data center facility in Enebakk, outside Oslo. Almost half of the capacity is already dedicated to a new international customer.
