

Papua new guinea off-grid solar

Overview

The government recently launched a key solar project in the Katima rural area of the Sinasina-Yongomugl District, Chimbu Province, designed to bring reliable electricity to off-grid communities where access has been limited. Private companies are also contributing to this. Off-Grid Masters Limited is committed to revolutionizing access to energy in Papua New Guinea's most challenging environments. By harnessing the power of renewable energy, we bring cost-effective, reliable solar and wind solutions to remote areas, homes, businesses, and government agencies. The effort, a collaboration between the governments of Papua New Guinea and Australia, has begun to install 8,700 solar. The Government of Papua New Guinea, with support from the United Nations Development Programme (UNDP) and the Government of Japan, today inaugurated the Advancing Energy Access: PNG Mini-grid Policy and Implementation Conference in Port Moresby.
