

Peruvian shelter solar system

Overview

Between 2018 and 2024, those panels were installed at Rubí and Clemesí, two massive solar plants in Peru's Moquegua region, about 1,000 kilometres south of the capital, Lima. Together, they form the country's largest solar complex - and one of the biggest in Latin America. From her home in the blistering desert of southern Peru, sunlight is abundant, steady, and strong enough to power hundreds of thousands of homes across the country. Explore the daily struggles of residents who can see solar panels glowing each night but have no ac.
