

# Photovoltaic bracket cable warranty

## Overview

---

During the warranty period, you don't have to worry about any hidden costs. For example, the warranty only applies if the cables are installed and used according to our. Our superior Balance of System (BOS) solutions help maintain these critical connections at every stage of the DC distribution system, from PV module to transmission line. We proudly back an extensive range of solar cable management solutions with our 20-year Build Solar Better Warranty. Whether. Nearly all major solar panels have a minimum quality warranty of 10 years and some are as long as 25 years, and the generation warranty is 25 years with a decay rate of 20% within 25 years. Inverter, the only electronic part of the whole system, can convert the DC current into AC current. Recent data from SolarTech International shows 38% of warranty claims relate to mounting systems, not the panels themselves. When investing in solar energy systems, the warranty period for structural components like photovoltaic brackets often gets overlooked. This could be something like a poorly welded joint that weakens the structure of the bracket over time or incorrect assembly that leads to misalignment of the solar panels.
