

# Photovoltaic panel installation 15 degree angle table

## Overview

---

The optimal tilt angle is calculated by adding 15 degrees to your latitude in winter and subtracting 15 degrees from your latitude in summer. Enter your address to find the optimal solar panel tilt angle for your location. When the sun is lower in the sky, solar panels need a greater. Our solar panel angle calculator takes the guesswork out of panel positioning, suggesting panel tilt angles based on your location's latitude and your willingness to reposition based on the sun's seasonal dance across the sky. Adjusting your panels to the right angle can increase yearly energy yield by up to 20 %. 4 degrees, the latitude of Phoenix. Results are shown in the graph below. Panels positioned perpendicular to the sun's rays absorb maximum energy, but the sun's position changes with seasons and your geographic location.
