

# Photovoltaic panel support block

## Overview

---

The solar panel ballast block is an easy and durable way to add ballast to your engineered solar panel array. Each block measures 4x8x16, weighs in at approximately 32lbs, and meets both ASTM C90 structural masonry and ASTM C1884 for concrete ballast block specifications. In the growing field of solar energy, contractors face unique challenges when it comes to safely securing solar panels on rooftops and other sensitive environments. These durable, easy-to-install blocks are designed specifically to. Secure your solar panels with 4" x 8" x 16" Solar Panel Ballast Bundle, designed to provide robust support and stability on rooftops. They provide the necessary support and stability, especially in rooftop installations where drilling into. The ROOST Support System has been designed to give you maximum versatility for all rooftop support applications such as pipe, conduit, cable trays, rooftop walkways, solar, HVAC and refrigeration. ROOST products are made with 100% recycled rubber, protect the roof membrane, dampen vibration, are UV. 4 in.
